Profile

Proactive and versatile IT professional with hands-on experience in technical support, network administration, and programming. I have a strong foundation in cloud infrastructure management, with a growing expertise in Google Cloud Platform (GCP) services, including deploying scalable solutions, automating workflows, and optimizing network configurations for cloud environments. My background in troubleshooting, system optimization, and network administration positions me to effectively manage cloud-based applications effectively, ensuring high performance and security.

Education

2022/07 – present Surakarta, Central Java	Bina Sarana Informatika University I am currently a 5th-semester student at Bina Sarana Informatika University, pursuing a degree in Information Systems under the Faculty of Engineering and Informatics. Throughout my studies, I have been trained in managing and processing information using web and mobile programming. I have developed skills in creating web applications and am continuously honing my abilities in various aspects of application development, including system analysis, database management, and user interface design. This educational journey has provided me with a solid foundation in the practical aspects of software development, preparing me to take on real-world challenges in the IT industry.
2019/05 – 2022/07 Pacitan, East Java	SMK N 1 Donorojo Proactive and versatile IT professional with hands-on experience in technical support, network administration, and programming. I have a strong foundation in cloud infrastructure management, with a growing expertise in Google Cloud Platform (GCP) services, including deploying scalable solutions, automating workflows, and optimizing network configurations for cloud environments. My background in troubleshooting, system optimization, and network administration positions me to effectively manage cloud-based applications effectively, ensuring high performance and security.

Professional Experience

2022/08 – 2023/02

Yogyakarta, DIY

Web Developer

Freelance Deraly Id

As a freelance web developer at DeralyID, I worked on numerous web application projects, primarily using the Laravel framework. I was responsible for building dynamic web applications tailored to client needs. Additionally, I developed static websites for wedding invitations, focusing on delivering clean, visually appealing designs with responsive layouts. This role allowed me to enhance my expertise in web development while adapting to diverse project requirements and timelines.

2020/05 – 2022/07

Pacitan, East Java

Network Engineer

Freelance

As a Freelance Network Engineer, I specialize in Network Administration and FTTH Installation, offering expertise in designing, implementing, and maintaining network infrastructures for diverse clients. My responsibilities include full-cycle network solutions, from setup to ongoing maintenance and issue resolution.

2023/03 – present

Surakarta, Central Java

Technical Support

Bina Sarana Informatika University

I worked as an Assistant Technical Support intern, gaining hands-on experience in troubleshooting various technical issues, network configuration, CCTV and network installation, and hardware/software maintenance. I actively assisted users with daily software, hardware, and web application issues, programming, etc
